

POINT DISTRIBUTION

DIECUT GRIPTAPE

Template for diecutting a custom shape into deck griptape.

Make sure your art will fit inside the **4" square**, and that it's fairly simple (minimize the amount of cut lines). Most sharp edges and fine details won't hold up in the cutting process.

After your graphic is prepared, place it on the griptape shape to the left to indicate where you want the shaped punched out.

Please make sure that once your graphic is on the griptape shape, that it still falls within the confines of a 4" square.

FONTS

Outline all fonts used in your graphics. This way your text is transformed into shapes and sending the font file is not required.

DO NOT FLATTEN TEMPLATE

Keep the template layer locked and untouched. You will have to re-send your graphics if they are merged with any part of the template.
